

THOMAS V RIECKE

Wildlife Biology Program, University of Montana
James K. Ringelman Chair in Waterfowl Conservation

RESEARCH INTERESTS

My research focuses on the collection and use of long-term demographic data to better understand the interactive impacts of environmental variation, climate, and human actions on the population trends and evolutionary ecology of wild organisms. I use models to quantify the contribution of different demographic components to population growth rates, and seek to work collaboratively across a range of ecological and evolutionary disciplines to address questions relevant to life-history evolution, applied ecology, and conservation decision making.

PROFESSIONAL APPOINTMENTS

Assistant Professor, University of Montana Department of Ecosystem and Conservation Sciences	2023–
--	-------

EDUCATION

Postdoctoral Research Associate, Swiss Ornithological Institute Population Dynamics Section, Ecology Department	2020-2022
Postdoctoral Research Assistant, University of Nevada, Reno Department of Natural Resources and Environmental Science	2020
PhD, University of Nevada, Reno <i>Perturbations and heterogeneity: estimating demographic rates of brant in western Alaska</i> Graduate Program in Ecology, Evolution, and Conservation Biology Advisor: Dr. James S. Sedinger	2020
MSc, Stephen F. Austin State University <i>Lead exposure and nesting ecology of black-necked stilts on the Upper Texas Coast</i> Arthur Temple College of Forestry and Agriculture Advisor: Dr. Warren C. Conway	2013
BA, Austin College Major in Biology, minor in Environmental Studies	2009
